

CODE FOR PEACE

***BE PART OF A
NEW COMMUNITY
DEDICATED TO
USING DIGITAL
FOR PROMOTING
PEACE***

Are you passionate about using technology for social good, civic tech or peace tech? Imagine using your digital skills to help peacebuilders create tools that promote peace. Whether you're a tech enthusiast, peacebuilder, or activist, **even if you are not a digital expert**, we invite people of all skill levels to be part of a new informal monthly meetup where like-minded individuals collaborate to build digital solutions for peace.

Our kickoff meeting is on October 4th at 2 PM at the Austrian Centre for Peace. We're thrilled to have **Sonja Fischbauer** from the Open Knowledge Foundation, who leads the „Code for Germany“ initiative, as our guest speaker. She'll share insights on how community-driven tech projects can make a real difference, how we can apply these strategies to peacebuilding and will be happy to answer your questions.

Come connect, share ideas, and help shape grassroots digital peace projects in a relaxed, informal setting! Whether you're a tech expert or just interested in peacebuilding, your skills and perspectives are valuable.

Date: Friday 4th October
Find us: Möllwaldplatz 5 / Top 7 1040 Wien
